Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 12/15/2003 has been entered.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 13 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding the claim, the phrase "-like" renders the claim(s) indefinite because the claim(s) include(s) elements not actually disclosed (those encompassed by "-like"), thereby rendering the scope of the claim(s) unascertainable. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-6, 8-9, 11, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Shim in view of Nagato. Shim discloses a sheet tray body (20) with a stepped portion (see

Art Unit: 3651

Fig. 3 and below) and a connection portion (see Fig. 3 and below); a shaft (12); and a sheet feeder body with a sheet mounting portion (10) having an upper edge (see Fig. 3 and below). Shim discloses all the limitations of the claims, but it does not disclose an abutting rib thrusting member. However, Nagato discloses an extendable feed tray that includes an abutting rib thrusting member (29) for the purpose of controlling the angle of the feed tray relative to a sheet mount (see col. 4, line 47 – col. 5, line 14). It would have been obvious for a person of ordinary skill in the art at the time of the applicant's invention to modify Shim by utilizing an abutting rib thrusting member, as disclosed by Nagato, for the purpose of controlling the angle of the feed tray relative to a sheet mount.

Art Unit: 3651

Response to Arguments

6. Applicant's arguments filed 12/15/2003 have been fully considered but they are not persuasive.

7. The applicant states that Shim does not disclose a stepped portion. In response, see above.

8. The applicant states that Nagato does not disclose a thrusting member that pushes the sheet tray body towards the sheet mounting surface. Rather, the applicant states that Nagato discloses a thrusting member that inhibits further movement of an auxiliary tray. In response, the examiner first notes that the corresponding structure in Nagato is element 21e. It is not clear whether the applicant's arguments are directed at this structure. Secondly, even if the applicant's characterization of the thrusting member disclosed by Nagato is correct, the examiner fails to recognize how the claim language is distinguishable from Nagato. In order for the thrusting member disclosed in Nagato to inhibit movement of an auxiliary tray in a direction away from a sheet mounting surface, it must push the tray toward the sheet mounting surface.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patrick H. Mackey whose telephone number is (703) 308-0630. The examiner can normally be reached on Tuesday-Friday 7:00 a.m. - 5:30 p.m..
